

VISUAL TIMETABLE SYMBOLS

Visual timetable symbols are designed to be used to inform the children in your group/class about what their morning, afternoon or day is going to look like. As a task or activity finishes, the symbol is taken from the timetable and added to an envelope at the bottom of the timetable.

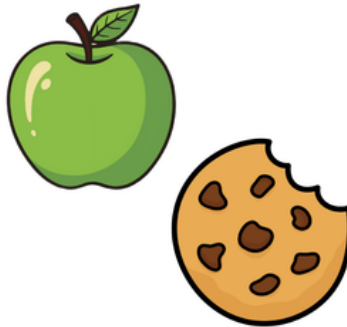

Print the symbol pages in A4 and use a guillotine to cut along the lines around the black frames. Add the symbols to an A4 laminating pouch, ensuring there is space in between each, which will allow for a good seal. You may need to feed the pouch through the laminator a second time if required. Add loop velcro to the back of each symbol.

Laminate a long, thin piece of plain paper and add one long strip of hook velcro. Attach a zip lock bag to the bottom of the timetable for symbols that have been used.
